

2007 Call for Posters

The Ultrasonic Industry Association invites you to submit a poster for display 19 – 21 March and presentation on 20 March 2007 at its 36th Annual Symposium in **London, England** at the National Physical Laboratory. Plan now to join UIA for this international conference featuring the best of ultrasound from both the United States and Europe. Accepted posters receive a reduced registration fee for the conference. For more information, please go to <http://www.ultrasonics.org/symp2007.html>

Please check the appropriate category of your proposed poster presentation:

Industrial Applications: NDE, Measurements, Cleaning, Atomization, Pulp/Paper, Metal and Plastic Joining and Fastening, Welding and Cutting Films, Fabrics, Metals and Plastics, Sonochemistry, Underwater, Remote Sensing

Medical: Surgical, Therapeutic, HIFU/LIFU, Biological Nonlinear Effects, Low Frequency Tissue Characterization, Bio-Acoustic Microscopy, Transducer Design/Materials/Calibration

Please print clearly

Poster Title _____
 Authors _____
 Presenters _____
 Main Contact Name _____
 Address _____
 City _____ State/Prov _____ Zip/Postal _____ Country _____
 Phone _____ Fax _____ E-mail _____

Deadline: 28 February 2007

Accepted presenters receive a discounted registration fee.

A poster is a 1 meter wide x 2 meter high rectangular board on which you can affix visually appealing material that describes your research. How you use this is up to you: you may choose to print out up to nine 8.5in x11in or A4 sheets of paper (e.g., paper copies of overheads) and tile the poster board with these pages. Or, you may choose to format a single large sheet of paper describing the work and attach that to the poster board. You may orient it with the long edge either horizontally or vertically. You should prepare the best material (visually appealing and succinct) that effectively communicates your research problem, techniques, results, and what is novel and important about your work.

What, when, and where to submit? Although the final deadline for submission is 28 February 2007, for any submissions that arrive by 16 February 2007, we will help verify that printing, and formatting is appropriate and provide feedback within a couple of days (with time to make a final submission by the final deadline). Any submissions that arrive after the earlier deadline will be taken as is and rejected if they do not meet the criteria. All posters should be submitted by email to uia@ultrasonics.org

Submit a one page abstract about your work/poster in PDF format by email. The poster itself should not be included in the email, instead please include a URL of the poster in your one page abstract---the poster should be available for download in pdf format from this URL.

The one page abstract should identify the key contribution of the work being presented in the poster. In addition, it should describe the particular the problem being addressed, what makes this problem interesting or important, and what your approach is to the problem. Include the title, authors, institutional affiliations, status (student, faculty, and so on) of each author and an email address of the contact author. In the final version of the abstract, you should also include a URL that will provide additional information about your work to the attendees.

Your abstract should not exceed one page; longer submissions will not be considered for review.

Submission process:

Submit your one page abstract as PDF attachment to uia@ultrasonics.org Be sure to include a URL for your poster in the abstract. If it is not possible to make your poster available for download via an URL, please contact the chair at uia@ultrasonics.org for alternatives. Your submission will be acknowledged by email within two days after you submit.

Please remember that the abstract should be no more than one page in PDF form only. Word documents will not be accepted.

At the symposium, we will distribute to all symposium attendees the abstracts in addition to the symposium proceedings.
